

ITT Inc.

# Investor Presentation

ITT

This presentation contains “forward-looking statements” intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. These forward-looking statements are not historical facts, but rather are based on current expectations, estimates, assumptions and projections about our business, future financial results and the industry in which we operate, and other legal, regulatory and economic developments. These forward-looking statements include, but are not limited to, future strategic plans and other statements that describe the company’s business strategy, outlook, objectives, plans, intentions or goals, and any discussion of future events and future operating or financial performance.

We use words such as “anticipate,” “estimate,” “expect,” “project,” “intend,” “plan,” “believe,” “target,” “future,” “may,” “will,” “could,” “should,” “potential,” “continue,” “guidance” and other similar expressions to identify such forward-looking statements. Forward-looking statements are uncertain and to some extent unpredictable, and involve known and unknown risks, uncertainties and other important factors that could cause actual results to differ materially from those expressed or implied in, or reasonably inferred from, such forward-looking statements.

Where in any forward-looking statement we express an expectation or belief as to future results or events, such expectation or belief is based on current plans and expectations of our management, expressed in good faith and believed to have a reasonable basis. However, there can be no assurance that the expectation or belief will occur or that anticipated results will be achieved or accomplished. More information on factors that could cause actual results or events to differ materially from those anticipated is included in the Risk Factors section of the Company's Annual Report on Form 10-K, Quarterly Reports on Form 10-Q and other documents filed from time to time with the Securities and Exchange Commission.

The forward-looking statements included in this presentation speak only as of the date hereof. We undertake no obligation to update any forward-looking statements, whether as a result of new information, future events or otherwise.

# Key Performance Indicators & Non-GAAP Measures

Management reviews a variety of key performance indicators including revenue, segment operating income and margins, earnings per share, order growth, adjusted free cash flow, and backlog, some of which are non-GAAP. In addition, we consider certain measures to be useful to management and investors when evaluating our operating performance for the periods presented. These measures provide a tool for evaluating our ongoing operations and management of assets from period to period. This information can assist investors in assessing our financial performance and measures our ability to generate capital for deployment among competing strategic alternatives and initiatives, including, but not limited to, acquisitions, dividends and share repurchases. These metrics, however, are not measures of financial performance under accounting principles generally accepted in the United States of America (GAAP) and should not be considered a substitute for measures determined in accordance with GAAP. We consider the following non-GAAP measures, which may not be comparable to similarly titled measures reported by other companies, to be key performance indicators for purposes of our reconciliation tables.

**Organic Revenue** and **Organic Orders** are defined as revenue and orders, excluding the impacts of foreign currency fluctuations, acquisitions and divestitures. Divestitures include sales of portions of our business that did not meet the criteria for presentation as a discontinued operation. The period-over-period change resulting from foreign currency fluctuations is estimated using a fixed exchange rate for both the current and prior periods. Management believes that reporting organic revenue and organic orders provides useful information to investors by helping identify underlying trends in our business and facilitating easier comparisons of our revenue performance with prior and future periods and to our peers.

**Adjusted Operating Income, Adjusted Segment Operating Income, Adjusted Operating Margin, and Adjusted Segment Operating Margin** are defined as total operating income and segment operating income, adjusted to exclude special items that include, but are not limited to, asbestos-related costs, restructuring costs, realignment costs, certain acquisitions-related expenses, and unusual or infrequent operating items. Special items represent significant charges or credits that impact the current results, which management views as unrelated to the Company's ongoing operations and performance. Adjusted operating margin and adjusted segment operating margin are defined as adjusted operating income or adjusted segment operating income divided by total revenue. We believe that adjusted operating income and segment operating income are useful to investors and other users of our financial statements in evaluating ongoing operating profitability, as well as in evaluating operating performance in relation to our competitors.

**Adjusted Income from Continuing Operations, Adjusted EPS and Adjusted EPS Guidance** are defined as income from continuing operations attributable to ITT Inc. and income from continuing operations attributable to ITT Inc. per diluted share, adjusted to exclude special items that include, but are not limited to, asbestos-related costs, restructuring costs, realignment costs, certain acquisition-related expenses, income tax settlements or adjustments, and unusual and infrequent non-operating items. Special items represent significant charges or credits, on an after-tax basis, that impact current results, which management views as unrelated to the Company's ongoing operations and performance. The after-tax basis of each special item is determined using the jurisdictional tax rate of where the expense or benefit occurred. We believe that adjusted income from continuing operations is useful to investors and other users of our financial statements in evaluating ongoing operating profitability, as well as in evaluating operating performance in relation to our competitors.

**Adjusted Free Cash Flow** is defined as net cash provided by operating activities less capital expenditures, adjusted for cash payments for restructuring costs, realignment actions, net asbestos cash flows and other significant items that impact current results which management views as unrelated to the Company's ongoing operations and performance. Due to other financial obligations and commitments, including asbestos, the entire free cash flow may not be available for discretionary purposes. We believe that adjusted free cash flow provides useful information to investors as it provides insight into the cash flow metric used by management to monitor and evaluate cash flows generated by our operations.

**Working Capital** is defined as the sum of net receivables, net inventory and current contract assets less accounts payable and current contract liabilities. We believe that working capital provides useful information to investors as it also provides insight into the cash flow metric used by management to monitor and evaluate cash flows generated by our operations.
